3	ecig_intro	Vaping devices are also known as electronic cigarettes, e-cigarettes, vapes, mods, pod mods, mini vape, and hookah pens. They are battery-operated devices that use e-liquid or e-juice to create a vapour. Some are one-time, disposable products. Others are reusable with a cartridge or tank system. We refer to ANY of those products as "vaping devices" and the action of using an e-cigarette or vaping device as "vaping". (This does NOT include vapourizers used for marijuana, unless specifically mentioned in the question.)	descriptive
